

Building Performance Analysis by PFCS

Managing quality in construction is hard. We can help. PFCS has been focused on issues of construction quality for the past decade, working on all types of construction projects by analyzing building failures and construction defects, performing inspections and testing, delivering total quality management (TQM) and construction training, writing articles and whitepapers, delivering technical presentations and offering sworn testimony. We have developed a modularized method for managing construction quality that is customizable to fit almost any project, budget and risk tolerance level.

Company Services

- Independent Quality Review (CA SB800)
- Building Envelope Consulting (WA EHB 1848)
- Building Inspection and Reporting
- Plan and Specification Review
- Testing and Leak Detection
- Installation and Repair Specification
- Mold and Moisture Assessment
- Property Maintenance Programs (OR SB 955)

Pete Fowler Construction Services, Inc. (PFCS) is a team of building consultants who aid clients with all types of *building problems*: from physical building performance to building-process issues such as planning or disputes. Our services include expert construction consulting, inspection and testing, estimating, management, training, and testimony. Our team is the best in the business and we use our unique system to develop and deliver comprehensive solutions that steward our clients through their situation in the fastest, most cost effective way. PFCS creates actionable information that everyone can understand and use to make informed decisions.
